EDMONTON, ALBERTA, FEBRUARY 19, 1949

SUBSCRIPTION \$2.00 PER YEAR

ST. ALBERT BRIEFS

ST. ALBERT.—Mr. and Mrs. Arthur Sevigny and Richard were visitors here on Sunday.

Mr. and Mrs. Jos. Jacobs were guests at the home of Mr. and Mrs. Jos. Bellerine Sunday.

Miss Pauline Pelletier, who now resides at Nelson, B.C., was a visitor at her father's home last week. She was expected to return on Tuesday.

Mr. Charles Brodeur went to Winnipeg last Friday to visit his mother who is ill.

We are sorry to hear that Mr. Jos Simard lost his garage, electric plant, his well and tools by fire last Sunday. He said he was going to re-build in zinc so there won't be any more fires. We hope that you will not have any more bad luck.

Father Gaudet is back from the hospital. We are pleased to see you looking so well, Father.

The three Musketeers were in St. Albert Sunday night.

We last heard that Mrs. G. A. Gaulin is doing very nicely after her operation last week.

Little Miss Elaine Perron, daughter of Mr. and Mrs. Eugene Perron, and little Miss Arlene Bell, daughter of Mr. and Mrs. George Bell, were taken to the hospital last week, one with an ear condition and the other pneumonia. We are told that they are getting along fine and they should come home soon.

Mrs. Leo Belhumeur is back home too, after spending a few days in the hospital.

Miss Simone Labelle is laid up at home for a few days. She had a fall at the skating rink last Sunday afternoon.

We are sorry to hear that Mrs. I. I. Bourgeois fell down the stairs at her home on Monday morning. Hope you will be up and around soon with not too many bruises.

We don't seem to keep track of who's sick, who's in the hospital and who has falls. We even make little errors by sending people to the hospital when they're not there, but sick at home. Lately so many are sick in the hospitals and at home that one is liable to get mixed up some time. So if you want everything correct, please give the real facts to your local editor.

Due to the road condition we are unable to get news from Villeneuve. Hope there will be some next week.

W.I. Will Meet February 22

ST. ALBERT.—The St. Albert Women's Institute will hold its next meeting February 22 at the home of Mrs. J. Bocock. Members and friends are requested to meet at Hector Lamer's store not later than 8:15 p.m.

Our provincial president, Mrs. E. E. Morton has requested that we set aside one meeting to the study and better understanding of United Nations.

So this month Miss M. Wolnie-wicz will be the speaker and "United Nations" will be her subject. She will also touch on the subject of the value of citizenship and Canadianization.

Members who have not received their programs will note here that the roll call will be "How I save steps at home."

Do come early so we can enjoy a very interesting meeting.

THE CHRISTENING OF PRINCE CHARLES

The baptism of His Royal Highness Prince Charles of Edinburgh, the infant son of Their Royal Highnesses Princess Elizabeth and the Duke of Edinburgh, took place in the White and Gold Music Room of Buckingham Palace. The infant prince was given the names of Charles Philip Arthur George, and the ceremony was conducted by His Grace the Archbishop of Canterbury. The service was attended by Their Majesties the King and Queen, members of the Royal Family and a few of their close friends. These pictures, the first to be seen of the infant prince, were taken immediately after the christening ceremony, and show the baby wearing the Royal christening robe of white silk and Honiton lace made for Queen Victoria's children and used since by the Royal Family. The baby prince is the centre of admiration in this happy family picture after the christening ceremony, where in the arms of his mother he is seen with his father and grandparents.—(Picture circulated December, 1918).

Women's Institute Hold Sessions

MILLET.—The February meeting of the Winesford Women's Institute was held at the home of Mrs. Henry Serfas with five members and one visitor attending. Roll call answer by the exchange of valentines.

Mrs. Emil King and Mrs. F. C. Hall were appointed to represent the institute at the meeting to be held with regard to building a new hall in the village.

A paper on "Child Welfare" was read by Mrs. E. Mortensen. Mrs. H. Serfas demonstrated making a rag rug on the sewing machine.

The white elephant was won by Mrs. R. Anholtz and the social quiz by Mrs. Fred King.

A social evening to be arranged to entertain members husbands will be dated as soon as weather and road conditions improve.

F.W.U.A. Hold Recent Meeting

MILLET.—The Millet F.W.U.A. met at the home of Mrs. Barbara Grover on the afternoon of February 3rd with 15 members and four visitors present.

Roll call, answered by "Historical Event of Your Community."

A discussion was held on what charitable organization should be

supported. By vote it was decided to confine our efforts to help the "Save the Children Fund." A collection for same was taken and \$13.00 will be sent immediately.

Mrs. Henry Ohlman, delegate to the joint convention held in Calgary, gave a splendid report. She answered the many questions on the new F. U. of A. in a most capable manner. A vote of thanks was tendered to Mrs. Ohlman.

The March meeting will be held at the home of Mrs. J. E. Scharff.

Refreshments for the afternoon were served by Mrs. Mars and Mrs. Thompson.

Millet Legion in February Confab

MILLET.—The Millet Post of the Canadian Legion held their February meeting on Thursday evening in the I.O.O.F. hall.

Final plans were made for the Legion Carnival which will be held on the evening of February 18th. In case of severe cold the postponement date will be February 25th.

Plans, costs and possibilities with regard to the building of a new hall were discussed. Invitations were sent to various organizations asking for representatives to attend a meeting to be held in the very near future at which this project will receive further attention.

LAC LA BICHE NEWS

LAC LA BICHE.—Mr. and Mrs. Bob Howlett are leaving Lac la Biche Thursday, Feb. 10, for Montreal where Bob will attend the Hudson Bay Fur Training School. The course lasts from 4-6 months. Bob will then obtain a position as post manager at a post of his own.

Tony Varze and the Binmeads sponsored a farewell party for Howletts on February 5. About 25 guests were present. Dr. Cadzow, Dr. Brinsmead and Tony Varze each gave a little speech and complimentary talk of appreciation for Mr. Howlett's contributions to sports, hockey and baseball. A lovely silver table Ronson lighter was presented to them by Tony Varze on behalf of those present. The guests danced and sang, Tony and Aveleigh doing justice to the singing. A delightful tea was served.

A tea was held at the home of Mrs. Dumas, February 3, to raise funds for the W.I.

Mr. and Mrs. Francois Parent are visiting Mrs. Parent's brothers, Ray and Art, in Providence, R.I. Francois says it's nice not to have to wear a parka.

Camille Ostigny and Raymond Dionne have gone to Trout Lake to fish. Good fishing, Camille.

LEGAL NEWS

LEGAL.—Laurent Champagne was rushed to the hospital last Thursday with a perforated ulcer. He was operated on as soon as he reached Westlock.

Last Wednesday a party was held for Janet Kaene. Despite the cold weather and bad roads a fair group gathered and danced.

Friday night there was a party for Raoul St. Jean and Miss Rita Demers, who are to be married next week. The cold and roads kept quite a few people from attending.

Sunday afternoon Mr. E. Patry was found paralysed in his house. He was taken to the hospital, but his condition has not improved as yet.

Miss Rita Garneau is in the Westlock hospital since Friday.

The Legal Credit Union has recently established a regular banking system. From now on shareholders will be able to issue cheques just as they would with any bank.

School Notes

ST. ALBERT.—One of the highlights on your social calendar this year is just around the corner. Everyone is talking about it, two committees have been formed to look after the details of the event, and the student body is out again trying to decorate the Community hall up to the rafters on the evening of March 1. As you have probably guessed by now, I am referring to the Mardi Gras dance where you will enjoy yourself as never before.

There will be a prize for the best costume. Go through your attic and take out of the moth balls your grandmother's petticoat, or your grandfather's top hat. Put on those and ten-gallon hats and let's have a hilarious time at the biggest and best masquerade dance ever held in St. Albert.

There will be gay decorations, cartoons on the walls, and for the more aggressive type of individual there will be a limited number of balloons to capture... just like New Year's Eve!

Our next show to be held in the Community hall will be on February 18 when we will have a treat for you: "The Courageous Doctor Christian." On the program for March 4 will be "Black Beauty," a picture which will be enjoyed by all those between the ages of 7 to 70.

The boys' hockey team has played several games in the past few weeks. The boys met stiff opposition from the St. Leon and Edmonton teams. However, they do improve as time goes on.

The students are happy to see Father Gaudet feeling better, and they wish to extend to him their sincere wishes for the best of health in the future.

H. G. YOUNG RETURNS FROM C.C.F. CONFAB

MILLET.—Mr. Henry G. Young arrived home from Ottawa on Friday last. He had been attending the national convention of the C.C.F. organization in that city, as one of the two members representing Alberta from the Provincial Council. He reports a general feeling of success from the conference.

UNIVERSITY NEWS COLUMN

A series of articles on the work of the various departments of the UNIVERSITY OF ALBERTA.

1. BACKGROUND AND ORGANIZATION

Not long ago a professor from the University of Alberta travelling in a remote area of the province helped a man from the neighborhood who was having trouble with his car. The man thanked the professor, and asked:

"Where do you hail from, anyway?"

"From the University," replied the professor, thinking that would answer the question fully.

"The University?" said the other. "Where's that?"

There are probably very few people who do not know that the University of Alberta is located in Edmonton in the southern part of the city, but there are probably a great many who are not aware of what goes to make up the University, what is taught there,

what research is carried on there and how it serves the people of the province. Since the provincial University and the people of the province have a close connection with each other and mutual responsibilities, it is important that they should become better acquainted.

The cost of providing University education has risen sharply in the last few years for two main reasons in addition to the general rise in prices. First, there are far more young men and women in attendance than before the war and it is necessary to erect new buildings to accommodate them—this at a time when building costs are the highest they have ever been.

Secondly, the new techniques of science require new equipment which is often very complicated and very expensive. Hence the University is obliged to seek increased financial assistance from the government — i.e. ultimately from the people of the province.

The University, on its part, has an increasing responsibility to the people. As our society and its economy become more complex, higher standards are demanded in all branches of professional education. The teacher used to be regarded as fairly well equipped for his work with a high school certificate and a year in normal school. We are now reaching the point where the normal period of advanced training will be four years culminating with the degree of Bachelor of Education. So it is in Medicine, Dentistry and Pharmacy, Agriculture, Engineering and Law.

The University must meet this need by means of better training for its staff and more elaborate library and laboratory facilities. New courses must be devised to meet new conditions in such faculties as Agriculture, Arts and Science and the rest and new programs outlined for new profes-

sional needs. In the past year, for example, the General Faculty Council has outlined new programs for Petroleum Engineering, Irrigation Engineering and Engineering Geology and the Board of Governors has authorized their being given.

The University is a large and complex organization devoted to two basic ends—that of teaching young men and women in order to keep alive the great body of knowledge which forms our cultural heritage, and that of pushing forward the frontiers of knowledge still further to promote a better life for mankind. These two functions are in the University, interdependent and inseparable.

The organization of such a great institution seems at first to be very complex, so a few words of explanation may be useful at the start of this series.

The University of Alberta was created by an act of the first session of the first legislature of the province in 1907, but it is now governed under the terms of a new act of 1942. The Lieutenant-Governor as representative of His Majesty the King in right of the province is the Visitor of the University. The position of highest dignity among University officials is that of Chancellor. He is elected by Convocation, is chairman of that body and confers all degrees. He is ex officio a member of the Board of Governors and chairman of the Senate.

The President is the chief executive officer of the University. He is appointed by the government and is ex officio a member of the Board of Governors, of the Senate, and of all Faculty Councils. He presides at General Faculty Council and in other Faculty Councils when present.

The Board of Governors handles all the business affairs of the University including the appointment of all members of the staff of academic rank, handling of the budget and of University property. It comprises the Chancellor, President of the University, the president and Vice-President of the Alumni, the Deputy Minister of Education, the Deputy Provincial Treasurer and a chairman and six members appointed by the government.

The Senate comprises a number of University officials as well as representatives of affiliated colleges and of the public at large. It acts as liaison body between the University and the public and makes recommendations for honorary degrees.

The General Faculty Council attends to all matters of an academic nature. It will be described in more detail next week.

Red Cross Campaign To Raise Funds

With particular emphasis on the health and medical services of the Canadian Red Cross Society, Arthur L. Bishop, chairman of the Red Cross National executive committee, today announced the official opening on Feb. 28 of the society's 1949 national appeal for funds with an objective of \$5,000,000.

"This sum is needed for the continuance of the vitally important peacetime work now being undertaken by your Red Cross," said Mr. Bishop. "The society's work in Canada is one of human kindness with citizens of every race and creed working together for a better national health and relief of human suffering."

Mr. Bishop referred particularly to the society's health and medical services. "A great deal has been accomplished in past years to bring modern medical aid within

reach of every Canadian but more remains to be done in the future," he said.

"This year the Canadian Red Cross hopes to see the completion of the free national Blood Transfusion Service, already operating in several provinces, so that every Canadian in need may receive the life-giving benefits of blood transfusion therapy without cost. The ultimate operation of this service on a fully national scale will mean the saving of many lives throughout the years.

"Another important Red Cross service is the Outpost Hospital program with 75 hospitals and nursing stations serving frontier communities from coast to coast. Through this service our modern pioneers are given a fighting chance to settle the frontier lands so that we may better utilize the tremendous resources of this country.

"There are other Red Cross services designed for the protection of Canadian lives and the promotion of better health. They include aid to sick and disabled veterans, Junior Red Cross, Crippled Children's Work, Disaster Relief, Medical and Dental Services, Swimming and Water Safety, First Aid, Home Nursing, Sickroom Supply, Loan Cupboards, Canadian Red Cross Corps, Emergency Nursing Reserve, Homemakers' Service and Highway First Aid Posts.

"The support of all the people of Canada is asked to make it possible to carry out this peacetime program. The Red Cross is confident that Canadians everywhere will respond to this important appeal, with the same whole-hearted generosity they have displayed in past years."

Representatives Wanted

We are interested in obtaining representatives to act as our agents for floral service in the following centres:

AMISK, BAWLF, HAY LAKES, LAC LA BICHE, LOUGHDEE, MILLET, MORINVILLE, ROSALIND, STROME and VIMY.

If you are in a position in your community we should be pleased to hear from you, giving us details.

Soil Conservation Everyone's Job

Nature did a good job in creating our soils. In most instances it gave the world large areas of good productive soil and provided all the necessary plant food to promote growth. Nature did more — it selected the crops to grow on the different types of soil. For example, on the low wet musk soils were the cedars; on the heavier clay loam soils, the hard-

woods (maples and oaks); and on the sand soils, the pines.

When man disturbs this balance of nature by cutting the timber, or when fire sweeps the area, Nature does not allow the land to stand idle. First the weeds appear, then the berry bushes or scrub, followed by fast-growing trees like poplar. By the time these die, the original trees are taking possession again, and if the stand is undisturbed long enough it will revert to its original condition.

During such a cycle the fertility is returned to the soil by leaves, fallen limbs and decaying trees, says G. W. Michael, Dominion Department of Agriculture, Ottawa. The humus content, which is very important, is maintained and increased by the decaying organic

matter. The humus acts as a sponge or blotting-paper, absorbing large quantities of water in seasons of plenty and releasing it during the dry periods. It changes the physical condition of the soil making it granular, open and loose, allowing the water, air and bacteria to go down into the soil and make it productive.

Over the years, man, in his need to produce annual or short-period crops, has offset Nature's leisurely way of replenishing the soil—but has unfortunately not provided a good enough substitute. Thinking of the soil as permanent, he has wasted much of the reserve plant food by removing from the soils more than he returned. Little thought was given to humus, until today many soils are low in humus content and the physical condition has changed from granular, open, loose soils, capable of holding plenty of moisture, to fine particles that compact, puddle and bake, and prevent the air and bacteria from entering deeply because there is no moisture carrying capacity.

Because of the very nature of these low-humus soils, they cause drifting and erosion as water can not easily penetrate them, but must run over the surface carrying much of the plant food down to low-lying areas and streams where it is lost.

Soil conservation is one of the big problems facing agriculture the world over. Much can be done by individual farmers by plowing down more cover crop and refuse and by making full use of manures and fertilizers.

in moist heat at fairly low temperatures. Roasting meat uncovered gives better results. The cooking time is longer but the cooking losses are less and the meat is more palatable.

Metal skewers in a roast will conduct the heat through to the centre of the roast and shortens the cooking period.

Canada's Food Rules recommend (daily):

1. One serving of meat, fish, poultry, or meat alternates, such as beans, peas, nuts, eggs, or cheese.
2. Also use eggs and cheese at least three times a week each and liver frequently.

PROTEIN IN THE DIET

By RUTH MURRAY
District Home Economist

First let us make sure we know what protein is. The prefix "pro" means first and protein is the first consideration in a diet for building and repairing the cells of our body.

We get protein from meat, fish, poultry, eggs, cheese, nuts, dried peas, and beans. The muscle meats and organs (liver, kidney, heart) also supply valuable quantities of iron. Meats in general are good sources of the B complex. Organs are richer in vitamins than the muscle tissue; liver ranks high in vitamin A. Pork is an especially good contributor of thiamine.

Fish, as well as being an excellent source of protein, contributes iodine, calcium, and in the liver—vitamin D. Because of its short muscle fibres it is easily chewed and digested. Fish is the only protein which is not noticeably toughened by high temperatures. For the best results in cooking protein use low temperatures.

There are several methods of increasing the tenderness of meat:
1. Mechanical. — Meat may be pounded to break the connective tissue and thus increase the tenderness. Finely ground meat produces more juicy meat balls than the more coarsely ground meats.
2. Freezing—increases the tenderness of meat.
3. Aging—increases the tenderness of meat due to enzymatic action.

4. Cooking. — Meat cooked for a longer time in the oven is more tender than meat cooked for a shorter time in water.
5. Acid—in the forms of tomatoes or sour cream is often used with Swiss steaks and stews.
The less-tender cuts of meat may be used as pot roasts, Swiss steak, braised meat dishes, stews and soups. Usually they are cooked

BLUE JAY NEWS

BLUE JAY.—The Grassland nurse, Miss Williams, visited the Blue Jay school and inoculated the school children and some of the adults of the community on Feb. 4. The inoculation was immunization from diphtheria. Mr. Mike Klimiuk furnished the translation for Miss Williams.

Mr. Alex Moroz is in Lac la Biche hospital with an attack of pneumonia. Mr. Harry Fisher is in hospital for the same reason.

The school van is going through to Grassland regularly. The road is right through except for a short distance by Mr. Harry Fisher's where there is a short detour on his field as the road is drifted in that spot.

Miss Jeannie Diest of Grassland came to visit Miss Rosie Ilnicki for the week-end but terminated her visit on Saturday when her brother arrived to take her home as she was needed there.

Mr. Mike Klimiuk took Mrs. Doris Harpertz, Mr. and Mrs. Yaki-muk, Mrs. Sawchuk and Mrs. Moroz to Lac la Biche on Saturday, Feb. 5, in his car.

I would like to retract and apologize for an item stating that Mrs. Frank Ilnicki was in Lac la Biche hospital, which appeared in the last issue. This item should have read: Mrs. Frank Dudia is waiting at Lac la Biche to enter the hospital.

Mr. Mike Lopachuk has returned from Edmonton after spending a few days in the city having his teeth attended to which were hurt in an accident.

SALESMEN WANTED

ATTENTION PLEASE

WANTED—Reliable man as Dealer around Lac la Biche. Experience not necessary. A fine opportunity to step into old profitable business where Rawleigh Products have been sold for years. Big profits. Products furnished on credit. Write Rawleigh's Dept. W-6-B-69-163, Winnipeg, Man.

Mr. H. Rowbottom had the misfortune of breaking his toe while at work in the Woodbend oil fields.

Born to Mr. and Mrs. Paul Melnyk, a daughter.

Mr. Walter Kapchinsky has completed sawing logs for Mr. A. Hopke.

The school van was unable to run Friday due to drifted roads. This was the first day the van has missed this year.

Mrs. A. Wedman has returned from an Edmonton hospital.

Mr. Murdoch McPherson of Kaleland is visiting his daughter, Mrs. A. Johnston.

Mr. and Mrs. Sam Wensel were guests of Mr. and Mrs. L. Wensel.

Gerald Bradford, son of Mr. and Mrs. G. Bradford, has left to join the R.C.A.P.

Maple Hill school has been reopened after being closed since Christmas.

The Ladies' Aid of the Evangelical Church met at the home of Mrs. E. Kublik. Mrs. G. Wuerfel presided. Lunch was served by the hostess assisted by Miss Doris Kublik. Members present included Mrs. G. Wuerfel, Mrs. W. Ertman, Mrs. A. Ertman, Mrs. O. Kublik, Mrs. R. Prier, Mrs. A. Schmidt, Mrs. K. Volkman, Mrs. A. Oertlieb, Mrs. Schultz, Mrs. E. Frederick and Mrs. E. Kublik.

Valentine parties were held in the primary and elementary rooms of the village school. Games were played and lunch was served. Valentine boxes were in each room, even the high school room exchanged valentines.

The Young People's Society of the Evangelical Church held its regular meeting at the home of Rev. G. Wuerfel. Lunch was served by Mrs. Wuerfel.

Mrs. L. Tremper was bridge hostess Wednesday. Mrs. H. Wegner won first prize and Mrs. A. Johnston won the consolation. Those present were Mrs. A. Schlender, Mrs. H. Wegner, Mrs. A. Janke, Mrs. A. Johnston, Mrs. T. Berkholtz, Mrs. F. Schlender. In the School Hockey League the Roaring Riders are in first place, the Pirate Dynamiters in second, and the Silver Canucks and Firecrackers tied for third.

MISSION NEWS

LAC LA BICHE.—The girls and boys from the Mission School are selling tickets on a beautiful walnut chest. They will appreciate your help. Their teacher, Rev. Fr. St. Gratien will buy a new radio for the school if they have success with the raffle.

Joe Cloutier and his wife were visiting relatives and friends lately at St. Paul. They were accompanied by Mr. and Mrs. Blowers who are now residents at the Mis-

sion. We wish them lots of happiness here.

Narcisse Ladouceur and Charlie Boucher left February 4 for Beaver Lake to fish.
Rev. Father Menard and Antoine Bouvier went to Collington on a business trip.

CORRECTION

LAC LA BICHE.—The Rev. Father Menard has no interest in the Alfred Beaudoin Store recently opened. Our apology to the Rev. Father.

FREEDOM FOOTNOTES

FREEDOM.—The Willing Workers had an interesting meeting at the home of Lilly and Laurel Bruns. The girls cut out a dress pattern to fit Florence Anderson and Florence is having quite a time sewing it. I think she will cut her own pattern the next time. Our next meeting will be held at the home of Alva Donnelly on Feb. 9.

We all wish Mrs. Ed Donnelly and Mrs. Fred Meyers a very happy birthday—and many more.

Clarence Mathews escaped being pulled into a buzz saw last week. His shirt and underwear was badly torn. Be a little more careful, Clarence!

This winter weather gets the best of a person. Ask Aino, she knows, especially when she saw won't work right.

Why is Don so glum lately? Didn't you get a letter, Don? Tough luck!

We wonder how Oskar gets all those pretty pin-ups?

We saw two busy men shovelling snow like blazes last Monday night. We wonder who they could be!

We are sorry to hear Erna Lehman is home in bed with the mumps. We wish him a speedy recovery.

Mr. Rezac was seen making his usual trip to Freedom on Saturday afternoon.

Erna Moltzan was home over the week-end. She likes her job in Edmonton but misses her friends at Freedom.

Adam Hauch, Jr., now employed with the Gulf Oil Co. spent the week-end at home.

The F.U.A. meeting was held in the Freedom hall on Feb. 3. Hans Pruess and Adolph Little (delegates), made reports concerning the Farmers' Convention held in Calgary. The film from the National Film Board was interesting. Lunch and a social gathering followed. An enjoyable time was had by all.

usual aurora borealis, does not do it justice.

This spectacle over Hughenden, Alta. had the appearance of two great wings joined directly overhead, the semblance to partly opened wings was enhanced by the fact that the blood-red streamers had the appearance of the spread feathers of a wing in flight.

It seemed to me that the eastern portion of this show was a reflected replica of the western form. It was early in the evening, 7:00 p.m. and the sun, already set, must have been directly in line with this aurora, shining through the western side, with conditions at higher altitudes probably similar to those which give us the brilliant red sunsets so frequently seen.

No mention is made of the aurora of the following evening, Jan. 26th. This had a most unusual form, streamers of light from all points of the compass ascending to merge together overhead, so that the whole heavens seemed to be like a huge umbrella encircling the earth.

The really brilliant show seems to have been missed entirely. This occurred on Jan. 19th about 10:00 p.m. and was seen in the eastern sky.

It was cold, 40 below zero, air full of powdered snow in suspension, a full moon shining through it from half way up the sky.

There was a great ring around the moon, apparently half a mile wide, at about that distance away, looked like a great wheel, for from the moon in the centre there were four flashing blades of scintillating radiance forming a perfect cross, and reaching to the large ring, like four spokes of a wheel.

In addition to this, the north and the south sides of this great ring had each a particularly brilliant moon-dog like a small rainbow on end, from the centre of each there again extended long blades of light that almost seemed to be trying to reach completely across the sky.

During the years in the west we have seen many great shows in the sky, but never have I seen anything to compare with this spectacle. The lines were all distinct, all uniform, the rainbow coloring so vivid, and the blades of light such as might be compared to the sun shining upon a polished steel shaft.

The whole eastern segment of the sky was taken up, the lower edge of the great ring appearing to rest upon the horizon.

I wonder if anyone else, other than the members of my household saw this?

Yours truly,

VICTOR T. J. TWIGG.

Two New Varieties Rustless Currants

Three years' patient propagation and cultivation culminated in 1948 at the Horticulture Division, Experimental Farms Service, Dominion Department of Agriculture, with the naming of two rustless varieties of black currant bushes.

Introduced in 1945 as Ottawa No. 381 and Ottawa No. 393, the varieties have been called "Crusader" and "Coronet" respectively. A cross between the ordinary black currant and a plant of the Siberian species, they have been grown in all parts of Canada and England and nowhere has rust been found on them. Controlled inoculation tests carried out in the New England States proved them immune to rust.

Rust is one of the most important diseases of the black currant. It is difficult to control and since it spreads from currants to white pine trees it makes black currants a menace wherever white pine is grown as a commercial crop.

The yielding ability of Crusader and Coronet appears to be well established. They were about even in yield trials at Ottawa and they scored up well in a test against four standard varieties.

Crusader and Coronet are much more vigorous in growth than most varieties and a planting area of at least six by eight feet is recommended for each bush. The fruit of both varieties is very large. Crusader bears long bunches of 10 to 12 berries. Coronet's bunches are shorter and carry about eight berries. But both varieties ripen fairly evenly and hang on well when ripe so that most of the fruit may be harvested at one picking.

Both varieties are high in protein and vitamin "C" content, have good flavor and make excellent jams and jellies.

Iodine in Salt Is Easily Lost

Study by scientists of the Dominion Department of Agriculture shows that iodine in salt can be easily lost. They found, for instance, that all the iodine in salt blocks had disappeared in two months after exposure in pasture, and that there was no chemical method of preventing this loss.

The answer is to only put out at a time, as much iodized salt as the animals will lick up in a few days. When fed in the stall, salt loses its iodine less rapidly, but no more than can be consumed in two months should be used at a time.

Iodized rock salt will keep well for about nine months if stored in a dry place in its original container. Loose salt containing iodine will remain stable up to 15 months if kept in tightly closed glass jars.

New Branding For Brucellosis, T.B.

To facilitate identification, in the marketing of cattle which have reacted to either the blood test for Brucellosis (Bang's Disease) or the Tuberculin test for Tuberculosis, the Veterinary Director General, Dominion Department of Agriculture, Dr. T. Childs, has announced a change in the regulations governing the branding of such cattle.

The new order, effective Jan. 2, 1949, requires that all cattle which have reacted to the Brucellosis test shall be branded with a "B" on the right hand cheek, the brand to be three and one-quarter inches in height by two and one-half inches in width. Cattle which have reacted to the Tuberculin

test are required to carry a "T" brand on the left cheek with the height set at two and one-half inches and the same length for the bar on the "T".

Formerly the letter "B" was tattooed in the right ear for Brucellosis and the letter "T" was punched, also in the right ear.

All cattle which have reacted to either tests mentioned, Dr. Childs reminded, when being disposed of, must pass through an abattoir at which the Dominion Department of Agriculture, through the Health of Animals Division, maintains a recognized inspection service.

Cattle which have reacted to the blood test for Brucellosis may, under special circumstances, be disposed of other than to an inspected abattoir, when the animal is not to be slaughtered.

J. J. Hambley Hatcheries

10730 101st Street Edmonton, Alta.

HIGHEST CITY

Jaichan, Tibet, at 15,870 feet above sea level, is the highest city in the world.

CLAWS DIFFERENT

The two big front claws of the lobster are different. The left one, bigger and heavier, is the grinder and is thick and blunt. The right or cutting claw is slender and tapers to a point.

145 MILES CONDUIT

Calgary laid out an underground wiring system for its down-town section 25 years ago and now has 145 miles of conduit with 62 miles of cable installed.

THREE HIGHEST FALLS

South America has the three highest waterfalls in the world—the Angel Falls in Venezuela, 3,000 feet high; and the Kukuena-an and Roraima Falls, both in British Guiana, both 2,000 ft. high. The water at Niagara drops only 167 feet.

Our Farmers Are Becoming Soil Conservationists

By J. M. FONTAINE
District Agriculturist

It is most gratifying to note our farm people's reaction to the daily warning of our soil scientists, economists and agronomists.

In agriculture, like in any other profession, we find wide-awake

people. We have farmers who are always inquisitive of any new discovery in the fields of plant breeding, feeding experiments, weed control, trials and soil conservation methods.

For the last three years we have endeavored to convince our farmers of the great economic importance of gradually replacing the summerfallow with forage crops for soil conservation, weed control and restoration of fertility to our agricultural land.

The response to our appeal has been so spontaneous that even the most informed, well advised people were inclined to believe that such a rush for forage crop seed was due to lucrative ready market for said seed. Speculation was credited for such a large acreage going down to forage crops.

I always felt, however, that the practice would serve as a great demonstration. I have reason to believe today that our efforts were justified. Enough acreage has been seeded to forage crops in my district, to convince the most sceptic of its possibilities in building our soils, increasing its fertility and competing with the weeds. Forethoughtful farmers will now adopt this practice as a sound, profitable and permanent one.

Society will always have to contend with the careless, indifferent, irresponsible types of people. Till they have lost the most of their economics accumulated through nature's kindness rather than intelligent management, till their property becomes a liability to the community, nothing more can be done than take pity on them.

On the other hand, the majority of farmers realize the benefit derived from following recommendations of agricultural advisers. The following is a striking example of the attention paid to soil erosion and the efforts of some people to control same. I might add that it is the district agriculturist's reward for his ceaseless recommendations of soil conservation.

"After all those years of grain growing and summerfallowing, I must do something to keep my land at home," said a farmer to me last Tuesday. "I have a whole quarter section which is so badly pulverized that for the last few years the topsoil seems to have disappeared. It is gradually moving away to adjacent farms.

"On the other hand, I have plowed a field, last fall, which had been down to brome grass

for a few years. This land was like new breaking, so I am strongly thinking of seeding the eroding land, which is a full quarter, to brome grass. Am I doing the right thing?"

After a lengthy discussion on crop rotation, an order for \$600.00 worth of grass and legume seed was left at the office, accompanied with this remark: "I should have done this a long time ago. All the people must become interested in rebuilding the soil. What happens on my farm is taking place all over the country. Our delay proves to be an expensive experience as we cannot farm without soil."

Yes, this farmer's remarks are only loud thinking of the majority of his fellowmen. It is rather unfortunate that we have to talk land reclamation in a district open to agriculture only half a century ago. It must be done, however, if we are to preserve the greatest heritage the province has granted us.

The example of this farmer should be followed by hundreds of others in the same area. Let us practice conservation not to have to enforce reclamation.

Talking Traffic Signals Will Ease Road Problems

The first talking traffic light signal, developed entirely in the United Kingdom, was demonstrated at Hayes, England, the other day. It is an automatic device, operating independently or in conjunction with traffic lights, which gives spoken warnings to pedestrians at road crossings. One typical message given at the demonstration was "Before crossing look right, look left, look right again. Thank you."

The apparatus in its compact, waterproof housing weighs approximately 30 pounds and is contained in a box fixed to the top of the signal post. It can operate either alone, with a timing device, or synchronized with a normal traffic signal. The new signal does not shout its instructions. It quietly coaxes people across the road or warns them of the need for looking left or right before stepping off the curb.

Fighter's Climb Is Sensational

The United Kingdom jet fighter, the Beryl Meteor, which recently climbed to a height of 7½ miles in 7½ minutes has achieved a feat hitherto unequalled for this type of aircraft. Only rocket-propelled machines like the American Bell X-1 have been able to surpass this latest performance. The Beryl, moreover, is not one of Britain's newest or most powerful turbo jets. Experts believe that with the use of power and still more powerful jet engines United Kingdom fighters will, in fact, be able to equal the climb rate of the Bell rocket plane—with this difference: the Bell has fuel for only 2½ minutes of powerful flight while the jet fighter can fly for several hours.

New Target For Coal Industry

Britain's coal mines will be expected to achieve an output of between 210 and 215 million tons of deep-mined coal this year. Lord Hyndley, chairman of the National Coal Board, announcing the new target recently disclosed also that the Board is aiming at an increase in labor strength to 736,000. The number of workers now on the colliery books is about 726,000 so that taking the wastage at an annual rate of some 65,000, it will need the recruitment of about 75,000 new workers to achieve this net increase of 10,000.

Open A National Memorial Fund For Boys' Clubs

The famous British radio comedian, Tommy Handley, who died recently, is to be commemorated by the National Memorial Fund. This witty jester was not only beloved by millions in Britain but had a wide and appreciative audience among overseas listeners to the British Broadcasting Corporation. Proceeds of the fund are to be devoted to furthering an object Tommy Handley had very much at heart — the work of the National Association of Boys' Clubs, which has a membership throughout Britain of 195,000 boys between the ages of 14 and 18.

Britain's Public Health Laboratory

Britain maintains a special organization for tracing the cause of any epidemic to its original starting point and recommending the appropriate remedies. This is done by the Public Health Laboratory run by the Medical Research Council for the Ministry of Health. It is a comparatively new body which has been working on a permanent basis only since the end of the war. It now has a central headquarters in London, with smaller laboratories in six main towns as well as regional branches in almost every county. At headquarters there is a collection of bacterial cultures relating to practically every known disease.

English Prayer Book 400th Anniversary

The Church of England throughout the world will celebrate, during this year, the 400th anniversary of the publication of the first English prayer book. This is now known as the English Book of Common Prayer which is based on the version first drafted and published during the reign of King Henry VIII's son, Edward VI. The Primate of Britain has appointed a committee to supervise arrangements for these celebrations. It is under the chairmanship of the Dean of Westminster. The celebrations will be concerned not only with the English Prayer Book in its original, but also as it has been known, used and loved by generations of English-speaking peoples throughout the world. The climax will be reached in May when special services will be held, both in Westminster Abbey and in York Minster.

Fashion Note From Britain

Although there will be no large-scale fashion parades at this year's British Industries Fair (Earls Court and Olympia, London, and Castle Bromwich, Birmingham, May 2nd to May 13th) there will be a vast amount of interest from the fashion point of view. Textiles (at the Earls Court, London, section) will be the leading exhibits and new nylon tricot fabrics, described as revolutionary, will be on view, as well as the latest materials from the cotton, rayon and woolen mills of Britain. There will not be a fashion theatre as in other years, and the space thus saved will provide more room for exhibits.

USE 21 LANGUAGES

The world-wide advertising program for the second Canadian International Trade Fair, to be held in Toronto next May 30 to June 10, is being conducted in 550 publications in 21 languages.

Millet Personals

Mr. and Mrs. A. L. Thompson, of Wetaaskiwin, were Sunday visitors to the home of Mr. and Mrs. Harry Phillips.

On Tuesday, February 8th, Mr. and Mrs. Martin Nelson, of the West Liberty district, entertained at a family dinner party in honor of the 21st birthday of their second son, Philip, and the 70th birthday of Mrs. Nelson's mother, Mrs. Harry Phillips.

The repeat included turkey and all the trimmings as well as two birthday cakes, one decorated with 21 candles and one with 70 candles.

Guests included Mr. and Mrs. Harry Phillips, of Millet, and Mr. and Mrs. A. L. Thompson and Gladys and Phyllis, of Wetaaskiwin.

Mrs. Lloyd Rupert underwent a serious operation on Monday last at the Wetaaskiwin Hospital, where she is still confined.

Harold Zayorkowski has returned to his home following an operation for appendicitis. He was a patient in the Wetaaskiwin Hospital. Mrs. Wm. Martshinski is now a patient in the Wetaaskiwin Hospital where she was operated on for appendicitis on Monday, Feb. 9th.

ROLLY VIEW NEWS

Fred Buss, truck driver for O. Blumenthal, was involved in a collision with another truck in Edmonton last week. Considerable damage was caused to both trucks but the drivers escaped injury.

The wedding of Mr. Irvin Ansgor to Miss Esther Treichel, of Ellerslie is to take place at the home of the bride on Thursday, February 17th.

Mr. and Mrs. Robert Grams have moved to Edmonton where they will reside for a few months.

The blizzard of last week blocked all roads in the district but the Rolly View trucks managed to get through to town after shovelling snow for five hours.

Mr. and Mrs. E. Fipke, of Westrose, were visitors in the district for a week.

Mr. Wm. Schmidt is having an auction sale on February 22nd and will move to Edmonton.

Mr. Leo Kneller, of Leduc, has

contracted to build the new St. Paul's Church at Rolly View this coming summer.

The Rolly View Luther League is planning an evening social at the home of Mr. August Grams on Sunday, February 13th.

The Ladies' Aid Valentine party was held Monday night, February 14th, at the parsonage. The men were also invited.

The amateur hour and pie social at the Parkdale School on February 25th should be well worth attending. Entries must be in before February 20th. Good prizes are being offered and everybody is welcome.

Carrying On!

MILLET — Mrs. H. A. Fulcher who has not been well has been ordered by her doctor to give up a lot of the work that she has been doing. Always an active woman in business and community affairs, Mrs. Fulcher has consented to carry on as long as possible as local editor of the Millet Bulletin and subscription representative.

The help and co-operation of everyone in the district in submitting written news accounts and paying subscriptions promptly to Mrs. Fulcher will be very much appreciated.

Millet Mixed Bonspiel Declared Success

MILLET — The Mixed Bonspiel came to a close on Wednesday evening, February 9th. Eighteen rinks took part and the three weeks' of play provided fun, good and bad games, and lots of entertainment for three weeks.

While play was on, members The Ladies' Curling Club are of various organizations manned the coffee and refreshment bar, planning to use some of their profits for double glass in the club room.

Winners were as follows and skipped by:

GRAND CHALLENGE

- 1—Don Wagner.
- 2—Herb Pogue.
- 3—K. Kerr, Sr.
- 4—Pete Olesky.

MERCHANTS EVENT

- 1—J. O. Barth.
- 2—Gus Kruger.
- 3—C. H. Thompson.
- 4—J. O. Harvey.

NO. 3 EVENT

- 1—C. H. Thompson.
- 2—Wm. Thiel.
- 3—J. O. Barth.
- 4—K. Kerr, Jr.

NO. 4 EVENT

- 1—K. Kerr, Sr.
- 2—Don Wagner.
- 3—S. Grapentine.
- 4—S. C. Moen.

Farmers' Bonspiel Held at Millet

MILLET — The Farmers' Bonspiel started Saturday morning, February 7th at 9 a.m. Finals were played off at 9 p.m. Nine rinks participated.

The local merchants and business men donated generously for prizes for all events.

The ladies of the Golden Glow Farmers' Union of Alberta, ran a refreshment booth all day, serving soup, hot dogs, pie, sandwiches, cake, tea and coffee.

Prizes for the Grand Challenge were won by rinks skipped as follows:

- First—Martin Moen.
 - Second—Stanley Grapentine.
 - Third—Leslie Rigby.
 - Fourth—Fred Barber.
- Merchants event prize winners:
- First—Roy Ferguson.
 - Second—Henry Moen.
 - Third—Clarence Grapentine.
 - Fourth—Erick Skjel.
- Consolation won by rink skipped by J. O. Harvey.

Highest score—S. Grapentine. Lowest score—C. Grapentine. Biggest single end—Henry Moen.

At Edmonton Meeting of M.-H.

EDMONTON — The Massey-Harris Company has conducted a two-day conference of company and agency executives in Edmonton last week. Plans were discussed for the 1949 farm machinery program and eastern officials stated that every effort by the company is being made to ensure delivery of all farm machinery now on order by district farmers.

Among those attending were L. B. Wilk, Millet; Lucien Provost, Legal; and Chas. Lebas, Lac la Biche.

MILLET NEWS

Mr. Stauntin Elder, former resident of Millet, now living in Poothilla, has been visiting here for the past few days.

The blizzard made it impossible for the rural mail carrier or the milk or cream trucks to get out of town to cover their routes on Friday morning.

Mr. Albert G. Rupert, who was a veteran of World War I, passed away in Edmonton. He was buried on Monday, February 14th, in Edmonton. Mr. Rupert had farmed in the Millet district since 1920.

HAY LAKES NEWS

Mrs. A. Soch was in Edmonton during last week.

Miss Ledin formerly of Meeting Creek, is employed in Mac's General Store, and is at present staying with Mrs. Hinkelman.

Miss V. Prokopuk is visiting with her folks at Tomahawk. Last week Mrs. A. Heinz was a city visitor, while last week also Mrs. A. Hinkelman visited her relatives here.

Home from Camrose Hospital following an operation is Mrs. Radowetz.

Mr. and Mrs. R. Heald motored to Calgary and Clive last week.

Mrs. N. Ogilvie entertained Wednesday evening, February 9, the occasion being Mr. Ogilvie's birthday.

A blizzard, the worst of its kind this winter, started Thursday evening and continued until late afternoon Friday, blocking all roads with hard drifts.

Monday, February 14th, was the occasion of Valentine parties, at school, in the afternoon, for the

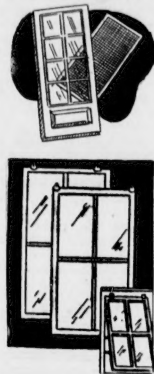

juniors and their little friends and at the teacherage in the evening for the seniors.

The dance planned for February 14th by the Hockey Club has been postponed until Friday, February 18th.

GOURIN NEWS

GOURIN. — Mr. Louis Ulliac, accompanied by Mr. Andre Ulliac and Miss Theresa Ulliac motored to St. Paul, Alta., last week. Mr. Andre Ulliac and Miss Theresa Ulliac remained in St. Paul for a week. They attended the Jeunesse, Agricole, Catholique.
